EDUCATION

VEL TECH HIGH TECH DR.RANGARAJAN DR.SAKUNTHULA ENGINEERING COLLEGE[IT DEPT]	2024-2028
CGPA: 7.5	
Jaya Matriculation hr.sec School[HSC] - 71.5%	2023-2024
Jaya Matriculation hr.sec School[SSLC] 75.8	2021-2022

PROJECTS

REAL TIME ACCIDENT DETECTION AND ALCOHOL MONITORING

- This project is designed to improve road safety by detecting vehicle accidents in real time and monitoring the driver's alcohol level. The system uses sensors such as an accelerometer, vibration sensor, and alcohol sensor to continuously monitor vehicle conditions and driver behavior. When an accident is detected, the system automatically sends an alert message along with the vehicle's location to emergency contacts using GPS and GSM modules

Keywords: IoT, Embedded Systems, Accident Detection, Alcohol Monitoring, GPS, GSM, Sensor Integration, Real-Time Monitoring, Vehicle Safety, Automation

CERTIFICATIONS

AWS – SOLUTIONS ARCHITECTURE JOB SIMULATION (FORAGE)

- Designed scalable and secure cloud architecture solutions based on business requirements.
- Applied core AWS services concepts including compute, storage, networking, and security.

TATA – CYBERSECURITY ANALYST JOB SIMULATION (FORAGE)

- Performed cybersecurity risk assessment and identified potential security vulnerabilities.
- Analyzed security incidents and recommended mitigation strategies.
- Gained practical exposure to threat analysis, incident response, and security best practices.

ACHIEVEMENTS

Best Innovation Award – Innovation Excellence Awards

- Received the Best Innovation Award for developing a Real-Time Accident Detection and Alcohol Monitoring System.
- Designed an IoT-based solution integrating GPS, GSM, Accelerometer, and Alcohol Sensors to enhance road safety through automated accident alerts and driver monitoring.

SKILLS

- Languages: JAVA,PYTHON
- Databases: MySQL
- Tools: Git, GitHub, Google AI Studio, Arduino, LaTeX
- Web: HTML, CSS, JSP, Servlet
- Design: Figma, UI/UX
